Looking for a Vibrant Home Environment Where Your Loved One Will Thrive?

Step inside our community and you will see how we are revolutionizing memory care with our resident-centered design, our savory meals, and our round-the-clock expert care.

Why the Villas of Sycamore Creek Ranch at The Heights?

Because it was designed with your loved one in mind. Our revolutionary resident centered designed community was purpose built for memory care, specifically, to address the unique needs of Alzheimer's, and age-related de-

Purpose Built Community

Our community was designed from the ground up to serve the needs of your loved one. When you step inside The Ranch you'll find lots of life, love, and laughter in a home filled atmosphere where residents thrive. We spent years researching and fine tuning our design where every detail matters. We made sure every detail enriched and supported the lives of our residents. Features include large studio floorplans with personal bath, adaptive living resources for safety, a multi-sensory environment to reduce anxiety, an abundance of natural light and adaptive lighting to help reduce sundowning, indoor and outdoor walking paths, friendly wayfinding interior design to help reduce confusion, and even night lights in the bathrooms. Details really do matter to us, because we understand the impact of dementia in the lives of our

Delicious Savory Meals

Just like at your home, mealtime plays an important role in your loved one's social life. Our community is built around the kitchen and dining areas where our team prepares fresh homemade meals, and tasty aromas, in our open kitchen... Bringing some much needed stability to your loved one's routine. Our menu features your loved one's favorite foods, and family recipes made from scratch.

Dining is one of life's greatest pleasures and should be celebrated with family and friends. Team members assist with family-style dining, and even join your loved one for the meal. So come and pull up a chair, families are always welcome to dine with their loved ones at The Ranch. That's why we designed our dining to be an intimate and warm setting.

Proactive Person-Centered Care

Who takes care of your loved one matters. We understand it takes someone special to help your loved one navigate through the challenges of memory loss. It all begins by choosing the right care team member. Once selected our proactive caring staff receives 5 times more training than the state requires. Through this extensive training and our intimate knowledge of each resident, we can begin to anticipate what triggers anxiety, thus redirecting your loved one's attention to create soothing, positive experiences without the use of mood-stabilizing drugs. Through love and compassion, we are committed to caring for individuals coping with memory loss, by affirming purpose, providing engaging care through innovative resources, and creating meaningful moments. In fact, we empower our dementia care team to find ways to create small impromptu moments that bring joy to the hearts of our residents. We believe these meaningful moments are just as powerful as planned activities. Our focus is to live life to the fullest every day, regardless of the care needs of your loved one.

When it Comes to Memory Care We are in a League All Our Own

"We moved my dad to SCR Memory Care and all I can say is Wow! What a difference from the other facility. The staff is amazing! The personal touch my dad receives every day has changed his life. The food is so good and the community feels just like home. I haven't seen my dad smile in months, and now he smiles everyday. Thank you for the peace of mind knowing dad is cared for..." The Corley Family
