Inhome Care for Veterans

The VACCN *Homemaker / Home Health Aide & Respite Care* is a benefit offered to Veterans who require assistance with their activities of daily living. Homemakers and Home Health Aides, while not nurses themselves, are trained professionals who can provide support and care to Veterans in their own homes. They are supervised by an Always Best Care (ABC) registered nurse who assesses the Veteran's care needs and supervises each individual case. This care is completely free or can have a small co-pay depending on the Veteran's status.

Caregiver support is an essential part of caring for our Veterans

Taking a wholistic care needs approach, the VA can authorize ABC to relieve family caregivers through additional **Respite** care. Helping family caregivers remain healthy is key to helping the Veteran remain independent and safe at home.

The specific services provided by the **Home Health Aide & Respite** benefit depend on the individual's assessed needs. Examples of daily activities they can assist with include eating, dressing, personal grooming, bathing, using the bathroom, mobility, meal prep, shopping, transportation and attending appointments. The frequency of aide visits can be determined based on the Veteran's requirements and availability of ABC's staff.

Home Health Aide & Respite hours are authorized by the VA in hours per week and can be as high as 40 hours per week depending on Veteran qualifications.
